

One City: 2023 - 2030

Years of recovery and renewal where we set ambitious goals and defined new pathways. Years of delivery and action, where we built the foundations for the future. In this decade Bristol laid the foundations for our ambitious future.

The city continued working towards becoming a sustainable, healthy and fair city. The city continued to address the short, medium and long-term impacts of the global pandemics and economic

Increased interest in protecting the environment and tackling inequality set inclusion and sustainability as key pillars in the city's recovery from the cost of living crisis and COVID-19. New employment pathways, redundancy support schemes, and training to reskill the workforce, helped those who had been most impacted by the recent crises. The 'Many Neighbourhoods One City' approach and Welcoming Spaces provided new opportunities for connection across all of Bristol's communities providing new opportunities for connection and tackling mental health and social isolation.

Upskilling and retraining programmes helped the city's businesses respond to the climate emergency by supporting the development of low carbon technology, business and supply chains and the delivery of Bristol City Leap and work with 3Ci brought much needed investment to decarbonise Bristol's infrastructure. Renewable district heating networks helped to tackle the issues of fuel poverty and provide renewable, efficient energy. The growth in the green economy supported Bristol to become a hub for low carbon businesses and retrofitting in the country and region. The city also established itself as a centre for low carbon excellence in the aviation industry and Bristol's first mass transit route was completed.

The transition of our public and private fleets to non-fossil fuel vehicles and delivery of a Clean Air Zone dramatically improved the air quality in the city. The health benefits of designing liveable neighbourhoods and putting the human experience at the centre of city design and management were quickly realised.

Better cycling and public transport infrastructure reduced the number of cars on the road reducing congestion and the number of people killed or seriously injured in Bristol. We embedded mental health and wellbeing into the operations of our organisations across the city. The work of Good Food 2030 transformed Bristol's food system providing access to nutritious and healthy food and bringing about food justice for all of Bristol's communities.

Parity became a byword for city success. Inequality in earnings between lowest and highest earners started to reduce. Specific steps were taken to increase the number of women, people from racially minoritized backgrounds, LGBTQ+ and disabled leaders across the city resulting in our workforce reflecting the diversity of the city. We adopted a zero-tolerance approach to the societal problems of domestic and sexual violence, working within communities and agencies to tackle the issues of Female Genital Mutilation and modern slavery. Through the Children and Young People's Board, the voices and issues faced by younger people were reflected in all levels of decision making.

- All children have access to healthy food at school, with school meals meeting high nutritional standards, considering their carbon and nature impacts and with improved access to growing food opportunities for children working with the Good Food 2030 partnership
- By acting on what children, young people and their families/ carers tell us and working with the Local Plan refresh, we have started to make a real difference to the city's communal spaces and streets so that they are more welcoming and everyone feels safer
- By reducing suspension, inclusion and school attendance rates are on track to be in line with the top quarter of best performing local authorities by 2028 (particularly for SEND and racially minoritised young people)
- The city is supporting Bristol's early years and childcare sector by ensuring any national government legislation changes are most effectively benefitting Bristol
- There is an ongoing upward trend in employment opportunities for young people, care leavers, older people and adults with learning difficulties and disabilities through local coordination and support for appropriate paid work experience and trainee / apprenticeship programmes
- A major events and festival programme celebrating the 650th anniversary of Bristol becoming a city is part of a refreshed campaign (including the Bristol Homecoming Campaign) to increase sustainable tourism, in line with the findings from the International Year of Sustainable Tourism 2017
- Innovation in renewable energy, infrastructure and ecological services is maximised through strategic partnerships, such as Bristol City Leap, to deliver the just transition to a sustainable city
- Bristol holds annual awards to recognise individuals, communities and organisations for their leadership and contribution to an environmentally sustainable and socially just future
 - 35% of domestic homes in Bristol are insulated to a high standard (C+)

- Bristol schools are supported to deliver Personal, Social and Health Education, including life skills, nutrition, sustainability, disability, mental and sexual health, menstruation, gender identity, gender reassignment and sexual orientation
- Citywide action to ensure the trauma informed practice model is embedded across all of Bristol's statutory organisations and trauma informed practice is commonplace
- Tackle child-on-child abuse, violence and discrimination by working with the Keeping Bristol Safer Partnership to reduce youth violence
- Gender, race, ethnicity and disability pay gaps are decreasing due to improved skills pathways and mentoring with routes to access senior employment opportunities (part-time and flexible)
- Following work in 2023, Bristol's skills provision reflects our economy's required skills (eg. jobs which address the climate and ecological emergencies) and builds career opportunities for those traditionally underserved and/or living in our most deprived communities
- Provide increased business start-up and scale-up spaces with strong digital access to grow in-dustry clusters and broaden entrepreneurship participation, particularly among underrepresented groups and sectors impacted by the pandemic and/or Brexit e.g. the care sector and hospitality
- The new planning policy (Local Plan) is adopted, with an emphasis on delivering the UN Sustainable Development Goals (including nature, wildlife, water, waste, resources, and wellbeing in decision making)
- With support from the Economy and Skills board and business support partners, 50% of citizens and businesses have actively made changes and are working towards a carbon neutral and nature rich city by 2030
- Wildlife-friendly food growing areas have been established in every ward in the city, using regenerative approaches to replenish the soil and manage water

- There are increases in young people entering careers in creative industries, due to improved access to cultural activities across communities, following the development of a One City local culture plan
- Bristol has an established annual celebration to champion children and young people in care and the parents and carers that support them
- A One City work experience scheme has been established to help care leavers, refugees, migrants and young people living in socio-economic deprivation to receive meaningful opportunities
- The use and promotion of alternative financial models has protected small and medium enterprises, particularly in the cultural and creative industries alongside a bid for City of Culture
- Leverage the city's property assets to attract regional and national investment and that can be used to deliver community priorities and help community capacity. e.g. community asset transfer, asset management and community right to buy
- In line with the Bristol Women in Business Charter's aspiration to become a city with a gender balanced workforce, organisations have put policies and structures in place to ensure an equitable opportunity is delivered for all women
- Reduce residual household waste below 180kg per person and ensure that 50% of all household waste is sent for reuse, recycling or composting
- Bristol City Council is carbon neutral for direct energy and transport emissions

• Water leakage has reduced by 15% since 2020

- Young people are able to access learning on key life skills (e.g. food, budget management) from members of their communities (e.g. older people)
- Work with the Economy and Skills Board is increasing diversity in the education and public sector workforce, enabling young people to thrive in a city that looks like them
- With support from Further and Higher Education, all parents or carers without full Level 2 qual-ifications have access to family learning programmes designed to increase children's literacy, numeracy, language and development, and enable parents to improve their own skills
- Specialist employment and training support is available for 16-24 year olds facing more com-plex barriers e.g. care-experienced; young people with SEND; young parents; and those aged 55+ who need/want to work
- There has been a 10% reduction in long-term unemployment and income deprivation in south Bristol following growth of employment & enterprise opportunities particularly in the cultural, digital and low carbon sector within those communities
- Promote businesses to reduce their Scope 3 indirect greenhouse gas emissions through the use of the local supply chain for low carbon and sustainable goods and services
- Bristol's physical, natural and social infrastructure protects high-density areas and the vulnerable from the impact of extreme weather events (e.g. flooding & heatwaves)
- Working with the Youth Council and schools across Bristol, schools have begun significantly reducing their material consumption
- The proportion of residents who visit Bristol's parks and green spaces at least once a week has increased in every ward and is now 80%, up from 56% in 2018

2023

- A strategic approach to domestic abuse, sexual violence, and harmful gender-based practices has been developed with more organisations signing up to the Women's Safety Charter and the recommendations of the Women's Health Needs Assessment taken forward
- The Integrated Care System is delivering preventive, proactive, personalised and integrated care, with the voluntary and community sector as an equal partner
- Address health and care workforce issues in a whole city context, and share good practice on inclusive recruitment, Time to Care and the Caring Economy
- 30% more people living in the most deprived wards are doing more than 30 minutes physical activity per week compared to 2019

2024

- 100 organisations in Bristol have signed Mind's Mental Health at Work Commitment and the work of Thrive at Night continues to support wellbeing in the night
- Building on the partnership working during the pandemic Bristol has a better response to mental health, particularly in children and young people, to build resilience throughout the life course
- Under 15% of Bristol adults smoke compared to 16% in 2021
- Children and Young People with SEND and their families have the support and information needed to thrive in education and employment
- Bristol has achieved the Fast Track Cities 95/95/95 targets
- •All vaccination uptake and health screening continues to be maximised in communities experiencing inequalities in health and work continues to establish a network of health hubs to support specific demographic groups
- The number of fuel poor homes in Bristol has significantly reduced, with improved energy efficiency of homes and increased access to advice services
- More than 50% of fast food takeaways in the city are selling healthier alternatives in line with the Bristol Eating Better Awards

Work with the Health and Wellbeing Board and housing sector

Bristol has developed a strong market for decarbonisation, with a growing skilled workforce of retrofitters and low carbon housing experts

has improved the quality of and access to green spaces for

residents living in high rise accommodation

- Collaboration across the city ensures the integration of climate and ecological standards in the strategic overarching development framework to guide housing, employment and infrastructure (Local Plan)
- Working across sectors, the city has begun to meaningfully tackle the issues (need, supply and quality) of temporary accommodation, considering different demographic challenges (e.g. refugees and migrants, older people & youth)
- There are clear plans to tackle issues of damp, mould, and fire safety in Bristol's housing which will include continuing work on fire safety in high rise accommodation
- Actions from the 2023 Race and Housing conference and History Commission are being considered by relevant partners and, where formally agreed, incorporated into the city's approach to housing in all forms
- Take forward actions laid out in the Living Rent Commission report to tackle the challenges of affordable, safe and healthy renting in Bristol
- New homes are being progressed at Hengrove Park, Temple Quarter, Western Harbour and across Brownfield Sites that are accessible, affordable, inclusive and sustainable
- Building on learnings from the COVID-19 pandemic Welcoming Spaces and the Many Neighbourhoods One City approach, Bristol citizens regularly connect and engage via a network of local community partners
- Work on decarbonising Bristol's housing stock is well underway with strong retrofitting indus-tries having been developed, in line with the Climate Emergency, with the **Environment and Homes Boards**
- Bristol's innovative work on Modern Methods of Construction net positive biodiverse housing
- Intergenerational housing has begun to be delivered in the city

helping to integrate Bristol's communities (particularly older people and students)

- A citywide programme is in place to ensure all public transport in Bristol is zero carbon by 2030
- Deliver local cycle and walking infrastructure priorities that enable walking and cycling journeys on main roads, ensure accessibility and provide access to local high streets and key
- Community based campaigns and delivery of subsidised transport for all children and young people results in more under 25s using public transport, enabling easier access to education and employment
- City Centre improvements (including the Old City, King Street, Bristol Bridge) are delivered, enabling improved bus access, cycling and walking routes to revitalise the central area and ensure full accessibility and safety
- The safety, accessibility and reliability of Bristol's public transport has been improved by considering needs of night time economy users and employees
- Established local food and freight consolidation distribution hub has reduced the need for HGVs to enter the city
- Coordinated promotion campaigns in retail, business and tourist locations have ensured that all visitors and citizens know how to easily move around the city in an affordable, accessible and sustainable manner
- A citywide parking policy that manages demand and includes residents' parking, where there is overwhelming local support, with red routes that are delivered to reduce private car ownership and to manage kerb space, is operational in the city
- Principles of good local services are reducing the need for travel within the city and supporting the delivery of Liveable Neighbourhoods across Bristol
- Travel training is provided for all school children across the city to support children to use active and sustainable transport across the city
- A ring of Park and Rides has been completed, including Mobility Stations, and all services have been updated to Metrobus standards seven days a week improving links into
- Ultrafast Wi-Fi is available on all buses and trains, and real time traffic management harnesses technology to improve the efficiency and accessibility of public transport and further reduce private vehicle numbers

As we built more affordable, quality and carbon neutral housing within Bristol, lower income families were able to live centrally and access employment and services more easily. The increase in housing stock also reversed the trend of increasing homelessness and ended rough sleeping in our city.

Teaching life skills training which tackled sexual health, money management, work preparedness, food and sustainability developed a resilient and prepared youth for the workforce. The launch of Bristol's Global Goals Centre provided a key resource to help citizens and school children understand their position in tackling global challenges at the local level.

Targeted interventions began to reduce the rates of worklessness in Bristol and supported industries with a shortage of employees and growth industries like healthcare. Training programmes and resource centres were opened which reduced the geographic inequality within the city, supported a just transition and began to provide cultural opportunities for residents in all neighbourhoods across the whole city.

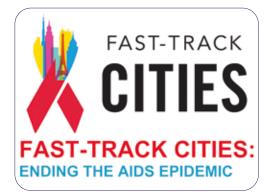

This resulted in the delivery of Bristol's 2030 carbon neutrality, ecological emergency and UN Sustainable Development Goals targets in 2030.

The solid foundation for the next decade was firmly in place.

One City: 2031 - 2040

A decade of forging ahead with the city working in partnership.

Having achieved Bristol's citywide ambitions set out in the climate and ecological emergencies, recovered and built back better from COVID-19, and laid the foundations to tackle entrenched inequalities, through improved connectivity and opportunities, between 2031-2040 Bristol began to feel the long-term benefits of these decisions.

Investment in mass transit and new transport links within the city has meant fewer cars on the road. This raised the number of people cycling and improved the air quality as well as transit times. Improved air quality had major health benefits too, rapidly reducing health inequalities across Bristol. Reliable public transport brought investment in Bristol's communities and began to tackle the entrenched inequalities that had been present in some of Bristol's wards for generations.

The two decades of housing delivery resulted in dramatic reductions in the number of people living in temporary accommodation. Restorative justice was increasingly used to tackle crime, anti-social behaviour and bullying. Active interventions in priority neighbourhoods reduced the unemployment inequality across the city and increased citywide cultural provision meant that all neighbourhoods felt their voices were heard and their story is told.

Improved digital connectivity with 6G technology across the city meant that employment, skills and learning opportunities were widespread. Following work in the previous decade to tackle the digital divide and new platforms to support communities meant that social isolation drastically reduced. Our innovative approach to investing in infrastructure and business growth gave rise to peer-to-peer lending, crowd funding, and credit unions. People could further invest in the city – financing great ideas that would otherwise be postponed or abandoned.

Our shift to carbon neutrality and prioritising the environment brought a dramatic change to our throwaway and consuming culture. This correlated with the rise of healthier spaces for people and biodiversity. Natural wildlife flourished across the city and the work done to deliver the Ecological Emergency Strategy resulted in a reversal of the longterm decline in bees and pollinating insects. The improvement in Bristol's waterways and natural habits began to show noticeable effects with the complete return of species like pine marten, red kite and beavers. The improved provision of green spaces across the city meant that Bristolians had easier access to parks. This led to increased physical activity, reducing obesity and health inequalities.

- All young people aged 18-24 are able to cook at least five meals from scratch
- Effective delivery of Personal, Social and Health Education, the embedding of Trauma Informed Practice in school and increased understanding of child sexual exploitation have reduced the rate of children and young people entering the care system due to abuse or exploitation
- Bristol's education infrastructure is carbon neutral, including school buildings, and there is a comprehensive School Streets initiative and increased active and sustainable travel for children and young people
- Following the work of the Our City 2030 project, at least one person from every inner city Bristol household is in a median salary job
- 100% of businesses in the city have been supported to decarbonised their Scope 1 and 2 emissions and are working to address their Scope 3 emissions
- Measurable increases are consistently recorded in the number of women entering and remaining in employment in the green, digital and new build economies
- Bristol is a Carbon Neutral and Climate
 Resilient City in accordance with the Climate
 Change strategy
- 100% of Bristol City Council and Housing Association homes are rated as high energy performance (C+)
- 30% of land in the city is managed for nature and pesticide use has reduced by at least 50% since 2020

- 90% of all civic and business leaders in the city are shadowed by young people from different neighbourhoods to help them gain an insight into city and business leadership on a day-to-day basis for at least one week a year
- The level of science, technology, engineering and maths (STEM) subjects at A-Level, degrees and apprenticeships taken up by young women is the same as young men, following partnerships with high-tech and digital employers
- The obesity gap has closed, bringing high levels of childhood obesity in deprived areas down to a similar level in the most affluent areas
- Bristol's cultural and creative industries continue to actively contribute to inclusive growth, breaking down barriers for those from underrepresented groups through partnerships with the Culture Board and key agencies
- Sustainable and accessible public transport addresses infrastructure gaps, specifically across local authority boundaries, including the Portbury, Avonmouth and Severnside Transport Strategy
- Bristol is a leading centre for the development and sales of low carbon goods and services for growing international markets e.g. through an eco-innovation fund and forum
- It is standard practice that major developments in Bristol are net carbon negative
- Work through the Ecological Emergency Strategy has ensured 100% of Bristol's waterways have water quality that supports healthy wildlife
- Bristol's larger employers measure their ecological footprints and have credible plans in place to make their operations nature positive

- Childcare as economic infrastructure is now included in all regeneration projects
- 50% of schools, colleges and university buildings have spaces which double as community resources, for example offering out of hours adult education, advice and support, or use of outdoor space
- The number of children and young people joining, or being exploited by criminal gangs has fallen to a record low
- The apprenticeship offer in the city has improved since 2020, and the percentage of apprentices in Bristol is more equitable and above the Core Cities average
- Tourism to Bristol is growing at a higher rate than the 2022 baseline trend including sustainable long-haul air links with key overseas business and tourism markets, whilst using digital connectivity to limit non-essential air travel
- The provision of affordable, quality and sustainable housing and employment opportunities in Bristol city and town centres enables more lower income families toeasily access employment and services compared to 2022
- The majority of communities understand their carbon emissions data and have used this to mobilise and take action
- Catering and hospitality settings offer climate friendly diet choices, with a 50% reduction in meat and diary provision against 2023 baseline
- A city-wide programme is in place to achieve zero residual household waste by 2050, including measurements of material flow in and out of the city showing consumption and production

- Bristol schools have fully and successfully implemented a 'no exclusion' policy
- 60% of young people are involved in extracurricular activities with their communities, including youth clubs, Guides and Scouts associations, and entrepreneurship activities
- All communities in Bristol are able to participate in the development and delivery of city-wide and local learning and skills programmes
- The number of businesses with B-Corp Status has increased by 50% from 2023 levels
- Bristol is recognised as a leading international trade and investment hub with links to the US, China, India, South East Asia; through its active community and business heritage links (e.g. India & Poland); and through our students and alumni
- Unemployment rates have fallen in areas of deprivation, and are now within 5% of the employment rate for the city as a whole
- Bristol's air quality is no longer considered a contributor to premature deaths and annual mean Nitrogen Dioxide levels are below 20ug at all city locations
- Bristol is supporting a wider range of wildlife, with the complete return of species such as pine marten, red kite and beavers, as a consequence of Ecological Emergency activity
- Community food distribution is recognised and sustainably funded to enable better access to local food, supporting stable, environmental food system change

- All children with behavioural disorders have the necessary support in place as early as possible, through earlier assessment and intervention
- Bristol schools support the move towards a local curriculum, based on the 'Curriculum for Life', ensuring children and young people are taught a wide range of life skills in schools
- Accredited, online, modular education courses are available to everyone in the city
- Local procurement policies, within the private sector, now increase the share of local purchasing, Business to Business procurement (B2B), with criteria that includes Time to Care with paid leave and representation of women and racially minoritised groups
- Earnings inequality between lowest and highest earners in the city has reduced by 30% compared to 2019 figures, as measured by the Gini Coefficient
- Alignment of public policy supports integrated and intensive local regeneration activity with a place-making focus
- Aggregated smart meter consumption data is shared openly with local authorities, as reported by connected applications, helping to shape programmes to reduce energy consumption
- Community food distribution is recognised and sustainably funded to enable better access to local food, supporting stable environmental food system change
- Every public building in the city meets the highest standard of energy efficiency

- Bristol has no new cases of HIV and HIV stigma is eradicated
- The design of the built and natural environment contributes to improving public health and reducing health inequalities as standard
- The health and care system services and supply chains are carbon neutral and are prepared for future climate conditions and hazards
- 20,000 low carbon new homes have been built (8,000 affordable) since 2020
- Work with Bristol City Leap has led to housing stock that is zero carbon and is part of wider city work to support a diverse ecological environment in new and existing neighbourhoods in line with the Climate and Ecological strategies
- Work with the Culture Board has resulted in all Bristol's communities feeling that their story and narrative is being told, and their contributions to the city are being recognised
- A mass-transit scheme for Bristol has had full funding agreed and design of the first route is underway
- 90% of people routinely use digital technology and have high broadband speed to improve outcomes in health and social care services, education, economic prosperity and democratic participation
- Bristol is the UK's most digitally connected city and features in the Top 20 'Digital Innovation Centres' globally because citizens of all ages can benefit from digital services

- Bristol is recognised as a leading city for dementia care
- A fully Integrated Care System is delivering health and care services with the community being the default setting of care
- People living in the 10% most deprived areas of Bristol are as satisfied with where they live and the quality of parks and green spaces, as people living in the most affluent areas of the city
- As part of the Many Neighbourhoods One City work, every neighbourhood in Bristol has a thriving and sustainable community anchor organisation and everyone has access to a cultural/creative opportunity within their neighbourhood
- Reoffending rates have reduced by 50% since 2018
- There is a significant reduction in the disproportionate likelihood of people from Black and racially minoritised people being stopped and searched
- Most deliveries within the city centre are made by electric vehicles, with freight consolidation centres situated at all key access routes
- A not-for-profit platform is connecting creative/ technology driven start-ups with investors and mentors, which provides income streams for civic projects and community ventures
- Superfast digital connectivity, with work towards ultrafast/gigabit capable, is available in all public spaces around the city including parks and there is affordable access to digital hardware and connections citywide

- Fewer than 7% of the total population are smokers All organisations in Bristol are committed to
- Permanent admissions to residential and nursing care are halved from 2018/19 levels with people living in accessible homes within the community
- Bristol is a leader in tuberculosis (TB) control with a year-on-year decrease in incidence and improved treatment completion rates
- Less than 50 households are in temporary accommodation in Bristol, down from 1200 in 2023
- Bristol's housing accessibility standards are best in class with all new homes fully accessible and adaptable to enable independent living
- Continuing the Many Neighbourhoods One City approach, the number of people in Bristol experiencing social isolation has fallen by 30% since 2022 with people knowing where in their community they can connect with people and opportunities and jobs
- The better use of fully accessible digital connections and the associated reduction in the digital divide has contributed to significantly reduced social isolation in the city
- Our efforts to reach 'vision zero' have resulted in a 50% reduction (based on 2018 figures) in those killed or seriously injured due to incidents on Bristol's roads
- Autonomous vehicle trials are carried out to improve alternatives to vehicle use on selected transport corridors to better manage efficient and reliable movement of people

- All organisations in Bristol are committed to adopting and implementing the Mental Health at Work core standards including providing time to care for employees
- Bristol will have embedded a whole systems approach to healthy weight across the city, ensuring environments support healthy choices that are accessible and affordable for everyone
- Child poverty rates have reduced from 23.2% in 2019 to below 18%
- City sporting and cultural facilities are internationally recognised and capable of hosting international events raising Bristol's profile and bringing associated economic benefits
- Support to retro-fit older homes is easily accessible, particularly through intergenerational housing schemes
- Working with the Keeping Bristol Safe Partnership trust in the police amongst Black and racially minoritised communities has improved as evidenced by local surveys and community outreach programmes
- Driverless vehicles are becoming common place in the city to improve movement of people and goods with safeguards in place to support vulnerable groups travelling within Bristol
- The number of commuters using active modes of transport (walking, cycling etc.) to get to work has increased beyond 50% since 2030
- 100% of public sector transaction services can be conducted online 24/7 improving citizens' ability to access services outside of traditional working hours

- Alcohol related harm in the population has significantly reduced, as measured by alcohol related hospital admissions
- Bristol is a city where it is easy for people to stay active as part of their everyday life, with segregated cycle paths that enable children to learn to cycle safely
- There has been a shift in the balance of power, so the voices of all citizens are actively heard
- Joint work with the Economy and Skills Board has resulted in the housing and construction sector are major employers of Bristol's communities and are fully reflective of Bristol's diverse communities
- Many Neighbourhoods One City has resulted in the number of citizens feeling involved in decision-making in their neighbourhoods has increased by 20%
- The Keeping Bristol Safe Partnership's work has reduced the number of first time entrants into the criminal justice system has decreased by 40% since 2022
- Mass transit links to Bristol Airport, North Fringe, East Fringe and Bristol to Bath continue to transform movement of people across the city
- Bristol's transport is considered best practice for supporting passengers with disabilities, including hidden disabilities, to travel within the city
- The proportion of passenger numbers on public transport has continued to increase year on year from 2022

q

Skills

- All students leaving secondary school know how to budget effectively and how to financially plan
- Through changes campaigned for in Bristol free and flexible good quality childcare and preschool education is fully available for all parents and carers
- A comprehensive student exchange programme continues to link young people from Bristol with our twinned cities and towns, and vice versa
- All young people in Bristol have the same access and opportunities to higher education, with university rates among young people in south Bristol matching levels within other areas of Bristol
- The programmes of businesses with more than 1000+ employees are aligned to enable a coordinated volunteering programme that bring the most benefit for the city and for businesses
- The overall employment rate of Bristol's working age population has increased to 82%, from 77%
- Residual household waste has fallen below 150kg per person and ensure that 65% of all household waste is sent for reuse, recycling or composting
- Tree canopy cover has increased by a 25% since 2018
- All publicly funded institutions and corporate businesses have divested funds to ensure financial activity supports human rights, biodiversity and does not contribute to climate change or ecological degradation

- All school leavers have learnt about the key skills related to innovation and entrepreneurship which are now key in the workplace
- Every citizen in Bristol has the opportunity to learn something new to improve their health and wellbeing
- Through work in particular with care leavers and traditionally excluded groups, Bristol is now a city where no young people (aged 15-24 years) are involuntarily not in education, employment or training (NEET)
- Bristol has the highest number of multi-national HQs among UK cities of its size
- Investment in the city has been promoted, with local people and businesses investing in Bristol, peer to peer lending, crowd funding and credit unions are encouraged
- The number of start-ups in Bristol has increased by 15% on the 2018 – 2022 rate
- Via a One City Approach all Bristol schools now produce and grow food for their own use
- Bristol's inclusive approach to tackling the Climate and Ecological Emergencies continues to be recognised as world-leading via recognised accreditation/awards/cited as best practice
- Bristol's urban biodiversity and habitats are a key highlight of the city's tourism industry

- Augmented and Virtual Reality plays a key role in education settings meaning children have more interactive and creative learning experiences
- As a result of education and awareness-raising. unintended teenage pregnancy rates are the lowest of all comparable cities in the UK
- The rate of all children and young people who experience mental health problems has reduced from 5% to 2.5%
- Bristol is recognised as a sustainable international business events and convention hub, and continues to be a globally awardwinning sustainable and equitable food and drink destination
- Harnessing the best use of technology, Bristol provides virtual and physical working spaces that maximise productivity, sustainability and provide a positive impact upon mental wellbeing
- All council-funded and community-led programmes as standard practice commit to ringfencing 5% of funding to project evaluation, to understand the impacts on communities
- There is a significant increase in the number of urban farmers (using residential, public and business land) and volume of urban food produced for local markets and communities
- Health outcomes in every ward have improved as a result of measures, such as Liveable Neighbourhoods, that were taken to address the Climate and Ecological Emergencies
- The long term decline in the number of bees and pollinating insects has been reversed following identification and protection of key populations

• Flourishing enterprise and innovation zones are attracting significant investment, creating high quality jobs and raising business rates revenue

The Global Goals Centre continues to

The school attendance rate for Bristol

development education

schools is 98%

2038

(NEET) for over 16s is below 2%

be an international hub for sustainable

• The levels of Not in Education/Employment

- Sickness rates within the workplace have fallen to below the national rate and the lowest among UK **Core Cities**
- The number of visitors (tourists and business travel) to Bristol is growing at a higher rate than the trend baseline from 2028
- Food skills for sustainable, healthy living are embedded throughout the education system and accessible, community-based skills opportunities exist citywide
- Local energy storage solutions help manage peak energy use periods across the local network to support the increased use of [more intermittent] renewable electricity generation
- Rain water is recycled at all properties across the city

- 75% reduction in the gap in levels of development at early years between children who live in the most deprived areas of Bristol
- All young people aged 16-17 living in Bristol have a clear learning, employment and skills pathway
- Virtual Reality and Augmented Reality technology enables lifelong learning, for career and personal development
- The proportion of older people (65+) in employment, education or volunteering has increased by 30% since 2022
- Bristol has a high proportion of exhibitions and projects of national and international significance compared to peer cities including a Culture Board led programme that celebrates and is invested in by the whole city, and is representative of its diversity and history
- The city has an internationally-renowned professional sports scene
- All commercial food waste is actively treated as a valuable resource
- Most consumers and citizens are using ethical financial products and services which support healthy environment and fair society
- All food shops, including supermarkets, are stocked with local food to reduce food miles and improve local food resilience

2035 2036 2036

- All students leaving secondary school are able to cook at least ten meals from scratch
- As standard we ensure recycled/reused medical equipment, that is fit for purpose, is shared with charities and to support international aid
- Personalised medicine, through the use of genomics, has changed the diagnosis and management of complex and rare diseases, including cancers, moving away from a 'one size fits all' approach
- Following collaboration with the Transport Board, Bristol's neighbourhoods are now well connected and provide all essential services within a 15min
- Restorative justice is now used as an intervention in a minimum of 10% of offences of crime, ASB
- The empty property rate in Bristol has reduced by 50% helping to increase the supply of available housing in the city
- Virtual and augmented reality applications, in line with global trends, contribute to a reduction in the need to travel for work, entertainment and social activities
- Bristol starts trialling 6G to provide near instant and unlimited wireless connectivity to empower citizens to utilise next generation digital applications for work, entertainment and healthy living

- The proportion of passenger numbers on public transport have continued to increase year on year
- Transformational use and growth in public transport as a result of the bus deal and delivery of Mass Transit

Bristol was recognised globally as a city leading in dementia care. The stigma of mental health was tackled as we set our sights on being known as a mentally healthy city. As the inequalities in socio-economically deprived areas and diverse communities were addressed in schools, they were also addressed in the workplace.

Bristol-based organisations increased their active participation in delivering the city's future with increased numbers of apprentices across all business sizes. New opportunities to undertake work experience and shadow city leaders helped connect Bristol's children to the workforce.

The city's green economy which had been vital to the delivery of the climate and ecological emergencies made Bristol and the south west a globally leading hub for low carbon goods and services. The city's internationally renowned professional sports scene and high proportion of exhibits of national and international significance meant Bristol continued to grow its profile on the world stage.

One City: 2041 - 2050

A decade of inclusivity, fairness and sustainability in a world-class city that is influencing on the global stage.

By 2050, Bristol has asserted itself on the world stage. Our leaders are as ethnically and culturally diverse as our city. There is no longer a pay gap in any sector and the earnings potential of a family does not depend on where they live in the city. In this decade, long-term interventions to reduce health and wellbeing inequalities resulted in measurable improvements. As food production in the city became more widespread and high streets had more venues promoting healthy lifestyles and wellbeing, the biggest contributors to early deaths and disability – diet, smoking and obesity – declined.

By 2050, we cast no doubt that Bristol is a global destination city. Sustainable tourism practices and early innovations in low carbon aviation made Bristol a hub for low carbon travel. Bristol has become a leading centre in educational and research excellence. This educational excellence is felt at all levels of schooling. By 2050, Bristol has one of the best early years education systems in the UK. All Bristol school curriculums include modules which explore the cultural diversity and history of Bristol's communities and the gaps in educational attainment are no longer linked to protected characteristics.

Fuel poverty and nutritional poverty have ended with no-one living in a cold home. Everyone can access high quality food across the whole city. The fear of crime in the city and reoffending rates fell dramatically and, by the end of the decade, all Bristol communities are free from prejudice and hate crime.

The city is well connected to the neighbouring region and this has brought inward investment, high speed rail links, and connected economic prosperity to the West of England and South Wales. The city's economy is built upon principles of reuse and recycling with most businesses operating with circular economy principles. The abundance of wildlife has doubled since the beginning of the One City Plan as has the city's tree canopy. Bristol is recognised globally as an exemplar for urban environment and its ecological habitats and biodiversity are at record highs. The city's air pollution has declined to the level of surrounding rural areas. Bristol is a zero-waste city with all materials treated as valuable resources in the circular economy.

£14bn in 2016

- 100% of schools provide facilities for out of hours adult education
- Every child who is educated in Bristol is given equal opportunity of paid employment in the city irrespective of the neighbourhood they grew up in or any protected characteristics (such as race, religion or belief, disability, sex, sexual orientation or gender reassignment)
